Sino-Danish Pilot Project on District Heating and Energy Efficiency Improvements

*Niels Frederik Malskær
Global Co-operation Advisor*

Cooperation between Danish Energy Agency and National Energy Conservation Center

- 2013 Memorandum of Understanding between the Danish Ministry of Energy, Utilities and Climate (MEUC) and the National Development and Reform Commission (NDRC)
- Positive response to Danish-Chinese cooperation in Denmark
- Delegations back and forth have been very productive

Overview of experiences so far

- Holistic heat planning is crucial to clean, efficient heating
- Strong focus on environmental goals will help push clean heating forward rapidly
- There is much accumulated knowledge on heat planning – spreading it is a challenge

Sino-Danish Pilot Project on District Heating and Energy Efficiency Improvements in China

- Results of first phase will be presented today
- Shaanxi Provincial Government, Tongchuan Municipal Government, NECC and expert panel have been extremely supportive
- Tongchuan faces challenges that many other cities across China face
- We hope to partner with other cities as they pursue President Xi's vision of a prosperous nation with blue skies

Next steps in our cooperation

- We hope to replicate the success of our partnership in Tongchuan in the next phase of our partnership with NECC
- Plans for a high level delegation to start the next phase are underway
- Clear utility in this work for municipal governments to help jump-start business plans and conversations with investors

Thank you for your
attention
